2 Layer Rubber Table Mat

Description

The 4500 series ESD control mats from Transforming Technologies are made of a durable 2-ply rubber. A conductive layer backs the static dissipative top layer that creates outstanding electrical performance characteristics. The 4500 series offers excellent resistance to hot solders, soldering irons and most solvents.

MT4500 is available in rolls or cut mats. Mats are packaged individually with two (2) female 10mm snaps. Grounding hardware included.

Meets or exceeds requirements of ANSI ESD-S20.20 and the recommendations of ESD 4.1.
RoHS compliant.
